

**Amendments to the Specification:**

Please replace the paragraph provided on page 64, lines 9-16 of the Specification, with the following rewritten paragraph.

FIGURE 2 is a functional block diagram 30 showing the search engine 21 of FIGURE 1. Each component is a computer program, procedure, or process written as source code in a conventional programming ~~country~~ language, such as the C++ programming ~~country~~ language, and is presented for execution by one or more CPUs as object or byte code in a uniprocessing, distributed or parallelized configuration, as is known in the art. The various implementations of the source code and object and byte codes can be held on a computer-readable storage medium or embodied on a transmission medium in a carrier wave.
